

COMP1004 - Lab 1 - HTML

Task: create a webpage similar to the one shown in `1004-lab1-webpage.png`.

- Only use HTML, no CSS.
- All the images are in `1004-lab1-images.zip`.
- You need to type the text.
- Use appropriate document structure including `doctype`, and `<html>`, `<head>` and `<body>` elements.
- The character set of the document should be set as utf-8 using the appropriate meta tag.
- Use appropriate HTML elements instead of CSS (no CSS is allowed).
 - For example, use `h1` and `h2` instead of changing the font size and style.
- The links do not need to link to actual pages.

Structuring the page with semantic elements

You need to use the semantic HTML element for the following:

- The header
- The navigation menu
- The main content
- The main text
- The text section(s)
- The image sidebar
- The footer
